SEE REVERSE FOR BENCH MOUNTING INSTRUCTIONS

① SELECT A MOUNTING LOCATION

- The Qlicksmart blade remover is ideally located near the site of scalpel use or clean-up area.
- For safety in use, mount bracket as near as practical to elbow height.
- **Use this template and dotted guide arrows** for correct positioning, with minimum height/side clearance
- Mounting location must provide stable mounting of bracket and blade remover.
- **BEWARE** of concealed wires, pipes & conduits.

② PREPARE MOUNTING SURFACE

- Remove any loose or flaking paint.
- Clean surface of any oil and grease.

③ MARK POSITION OF BRACKET (use this template for correct positioning)

④ FITTING (select your surface type: **A** or **B**)

**A. FOR CABINETRY, TIMBER OR METAL**

**B. FOR MASONRY OR HOLLOW WALLS**
